

LETTER OF ENDORSEMENT

To Whom it May Concern,

In our capacity as the Portuguese authority for the implementation of the European Qualifications Framework (EQF) and the European Quality Assurance Reference Framework for Vocational Education and Training (EQAVET) in Portugal, we are writing regarding the research project **EQAVET+ “A standardized practical toolkit to implement the European Quality Assurance Framework for Vocational Education and Training”** and we would like to express our support for this project and our conviction that this applied research will be worthwhile.

Supporting this project means we will:

- Provide the consortium with sources and references for the Desk Survey (IO1) and PT contacts for the application of the European survey (IO1);
- Provide input knowledge to the development of competence profiles (IO2) and curricula (IO3) for EQAVET users – e.g. by sharing competence profile and curricula templates and by validating the contents developed for them in this project;
- Consider the publishing of the competence profiles and curricula developed in the project if we find them fit for purpose;
- Provide input knowledge to the development of the EQAVET+ Toolkit – e.g. by sharing documentation previously developed by us about EQAVET;
- Re-publish and disseminate the EQAVET+ Toolkit through EQAVET network and media channels if we find it fit for purpose.

Sincerely,

Filipa Henriques de Jesus

Director of the National Agency for Qualifications and Vocational Education and Training
