

VET21001  
Improving VET through Standards

## Difficulties identified by VET Providers when adopting EQAVET

**Low focus on principles of quality**

**Lack of clear, objective definition of quality criteria**

**Diminishing standardisation due to the influence of different national contexts on EQAVET implementation**

**Lack of systematic staff training**

**Inadequate management of Quality Assurance tasks**

**Too much focus on results/outputs of quality assurance measures, rather than on input**

Full findings are available in the report  
**'Gap Analysis on EQAVET Adoption**
